Sneaky Finds

Quick-start guide | Eight scenes, eighty discoveries | October 9, 2026

Download and play

Download **Sneaky_Finds.html**. Open it from your browser's Downloads button, or save it on your Desktop and double-click it. The game and all eight scene pictures are included in this single file, so it can run offline. This PDF is the companion guide.

The search

Find ten objects in each realistic scene. The green panel lists the objects to look for. Tap an object name to see its picture. Tap the object inside the scene to check it off. Wrong taps carry no penalty; the timer counts up.

Eight places to explore

Antique Shop	Garage
Warehouse	Grocery Store
Dusty Attic	Greenhouse
Cozy Library	Lost & Found

Make yourself comfortable

Zoom: Use + and - or pinch on your phone. Drag the scene to explore while zoomed. Fit returns to the overview. Scroll the green object list on your phone to see all ten names.

Hints: Show a hint circles a missing object for six seconds. Hints are unlimited, and your result records how many you used.

Audio: Music and object-found sounds have separate on/off switches. Music starts when you turn it on and pauses when the game tab is hidden.

Exit: Saves and pauses your search, then returns to the scene menu. Resume current scene continues where you stopped.

Progress: Your current search and completed scene best times save in this browser on this device. Switching to another scene resets an unfinished search. Restart scene begins the same search again. The timer pauses when help or clue details are open, or when the tab is hidden.
